*American Grown
for American Gardens*

TULIP GRANGE

D. O. Bow, Washington

THE BULBS here listed are grown by us on soils containing the combination of plant foods needed to produce perfect bulbs; all are top size and selected quality. None that are cut, bruised or mildewed are used, and all are hardy. There is distinctly an advantage in buying American grown bulbs for American gardens, provided they are *well* grown, and purchasing directly from the grower insures ease of adjustment in case of unavoidable error.

Having spent many years in selecting varieties to insure having only those scoring high on all points, and of proven desirability and popularity, we are not using valuable catalog space with reiterated descriptive superlatives; rather we have tried to state concisely the distinguishing points of interest of each variety.

We guarantee bulbs true to name. We file orders for Fall delivery, asking no deposit, and ship them in rotation as filed, shipping as we consider safest and best for the bulbs, beginning in August. When bulbs reach you, open the package and place contents in cool, dry, well ventilated storage until planting time. All orders are booked to be "paid for upon delivery"; so please remit promptly upon receipt of bulbs. Prices include packing. Cost of Transportation will be added to bulb invoice. A table giving approximate weight of bulbs in the various classes will be found on page 12.

Packages that are sent C. O. D. will include extra bulbs to cover additional cost of remittance by purchaser.

Please do not ask us to send mail order amounting to less than \$1.00.

Prices in this book cancel all previously quoted and are subject to stock being unsold at date of order.

TULIP GRANGE,
